Esta lista contiene pares de nombres de medicamentos con similitud ortográfica o fonética asociados a errores de medicación registrados por el ISMP-España, que han sido comunicados al sistema de notificación y aprendizaje de incidentes por medicamentos, financiado por el Ministerio de Sanidad, Servicios Sociales e Igualdad, o al programa de colaboración con el Consejo General de Colegios Oficiales de Farmacéuticos.

Se ha utilizado la técnica de "letras mayúsculas resaltadas" en aquellos nombres de medicamentos en que se recomienda aplicar (Farm Hosp. 2011; 35: 225-35).

Los nombres comerciales tienen la primera letra siempre en mayúsculas y los nombres genéricos en minúsculas. No obstante, en algunos nombres se han incorporado letras mayúsculas resaltadas en su letra inicial, por lo que no se reconoce si son nombres genéricos o comerciales.
